

INVESTMENT PHILOSOPHY

Archea Spectrum is a global fund of funds which invests, without geographic or sectoral restriction, in mixed investment strategies done by experienced management teams. The fund is designed for all type of investors who seek a flexible market exposure.

FUND MANAGER'S COMMENTS

The month of August had started badly in the markets, with a decline of nearly 5% for the main indices, before recovering in the second half of the month. Finally, the Eurostoxx 50 fell -1.16% and the S&P500 (in USD) -1.81%. The Spectrum fund decreased by 0.67%.

The trade war between the US and China is still raging and accelerated in August. Negotiations are stalling and investors are living between hope and desperation to see a solution. Markets weakened by the collapse of long rates and the reversal of the yield curve in the US, "over-react" to any news. This poker game begins to impact global growth which decreased to 2.8%. Europe is a collateral victim. A good example is the automobile sector with German cars exported from the USA to China which are therefore taxed as US products. Leading manufacturing PMI indicators are collapsing in the US and Europe, while services are holding up. "Official" figures show no slowdown in China, but the auto market plunged. Brazil is moving towards a recession. Finally, the impact of a hard Brexit, more and more likely after Boris Johnson's decision to suspend parliament for 5 weeks, does not seem to be in the prices yet. Central banks are back on the road to implement accommodative policies. On the other hand, Trump's pressure on the Fed has never been stronger. The latter says it is ready to react to an economic slowdown, but it can do nothing against the trade disorders.

As already mentioned last month, in order to make the portfolio more resilient to a possible decline in the markets, we strengthened our position in **Varenne Global** from 3.4% to 7.7%.
