ARCHEA FUND - PATRIMOINE, class B2 (LU0332993467) a sub-fund of ARCHEA FUND

Management Company: Bellatrix Asset Management S.A.

Objectives and investment policy

Objectives

L'objectif est la recherche d'une plus-value en capital à long terme et permet aux investisseurs de participer au potentiel de croissance d'un portefeuille diversifié d'actions et obligations grâce à une stratégie basée sur une sélection active de valeurs de sociétés internationales.

Investment policy

Le compartiment investit principalement dans les catégories suivantes d'instruments : actions, obligations convertibles et fonds d'investissement. Les investissements sont réalisés sans limitation géographique, sectorielle ou monétaire. L'allocation entre les différentes catégories d'instruments est variable en fonction de la valorisation des différentes catégories d'instruments et des circonstances de marché. The portfolio is actively managed on a discretionary basis without using a ref-

erence benchmark.

The reference currency of the sub-fund is expressed in EUR. The currency of the share class is expressed in CHF.

The investor has the right to redeem his shares on demand. The dealing in shares is carried out on each complete bank business day in Luxembourg. The attention of the investor is drawn to the fact that in exceptional circumstances, the possibility for the investor to request the redemption of his shares may be limited or suspended.

These shares are capitalisation shares. Income and capital gains are reinvested.

Recommendation

This fund may not be appropriate for investors who plan to withdraw their money within 4 years.

Risk and reward profile

What does this synthetic indicator mean?

- The shares of class B2 are classified in category 6 because the value of the share may be subject to high variations and consequently the risk of loss and the opportunity of gain may be high.
- The risk category has been determined on the basis of historical data and may not be a reliable indication of the future risk profile. The risk and reward category shown does not necessarily remain unchanged and the categorisation of the fund may shift over time.
- The lowest category does not mean a risk-free investment.
- Repayment of the initial investment is not guaranteed.

Which materially relevant risks are not adequately captured by the synthetic indicator?

- *Credit risk*: investments in debt securities entail a credit risk insofar as the issuer of the securities may refuse or be unable to honour all or part

of the interest payment or payment of the main amount of these securities. Investors run the risk of losing a significant amount, or even the full amount, of the value of their investment in these securities;

- *Counterparty risk*: the use of derivative instruments that are not listed on the stock exchange or traded on another regulated market (OTC instruments) entails a counterparty risk insofar as the counterparties of these derivative instruments may, at a certain point, find themselves unable to honour all or part of their commitments towards the sub-fund;
- *Listed derivative instruments for hedging purposes*: futures contracts are used to reduce the risk of loss on the international shares portfolio or reduce international interest rate risks, though such risks cannot be completely eliminated;
- *Listed derivative instruments for purposes other than hedging*: futures contracts are used to increase the sub-fund's potential gains, but entail a leverage risk insofar as the sub-fund is more exposed to risks on international equities markets and risks related to changing international interest rates than if the sub-fund did not make use of these instruments.
